Assessments of Early Childhood Developmental Strengths and Needs

Battelle® Developmental Inventory (BDI-3®)

- Comprehensive play-based assessment of developmental milestones across social-emotional, cognitive, motor, and adaptive domains

- Items can be administered via interview, observation, or structured formats

- Screening test allows for efficient evaluation of developmental skills

- Developmental Complete test allows for holistic and comprehensive review of developmental skills

- Comprehensive reporting through Riverside Score including skill level indicators

- Digital administration through the Mobile Data Solution

- The BDI-3 Spanish is a translated and adapted version of the BDI-3, and is appropriate for children whose primary language is Spanish.

Battelle® Early Academic Survey (BEAS™)

- Common Core aligned assessment of foundational reading and math skills

- Covers a wider breadth of foundational academic skills when compared to the ECAD

- Comprehensive reporting through Riverside Score including skill level indicators

- Digital administration through the Mobile Data Solution

WJ IV™ Tests of Early Cognitive and Academic Developmental (ECAD™)

- Wider breadth and more formal measure of cognitive functioning when compared to the BDI-3

- Adapted from trusted WJ IV tests aligned with CHC-theory which facilitates case conceptualization

- Analyze strengths and weaknesses within and across cognitive and academic domains

- Pair with the WIIIP to generate comprehensive reports

- Provides delay scores that can be of interest in eligibility decision-making
