

# A Connected System for Student Behavioral Health

Turn insight into daily student support within a proactive MTSS framework.

By combining the DESSA's evidence-based screening, assessment, and progress monitoring with Move This World's engaging and easy-to-use PreK-12 instruction, districts can create a truly connected system for supporting student behavioral health.

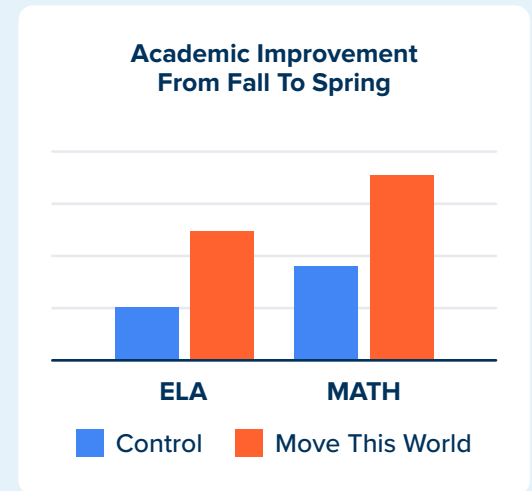

Rather than relying on separate tools, this integrated approach links insight to action across all tiers.

### Educators can:

- Identify needs early through universal screening
- Deliver instruction and supports grounded in real data
- Reinforce key competencies daily through classroom routines
- Monitor progress over time and adjust as needed

## Academic Improvements

Schools using Move This World saw greater improvement in Overall Emotional Skills Assessment Score and larger growth in academic achievement:

## Proven Impact

Schools implementing DESSA have seen meaningful improvements in student outcomes:

- 76%** REDUCTION IN DISCIPLINE REFERRALS
- 80%** REDUCTION IN OUT-OF-SCHOOL SUSPENSIONS
- 47%** IMPROVEMENT IN ATTENDANCE
- 10-13** PERCENTILE POINTS IN ACADEMIC GROWTH  
THE EQUIVALENT OF 1 SCHOOL YEAR OF ACADEMIC GAINS

When insight is paired with consistent classroom practice, schools can reinforce the skills that drive these outcomes.

## Insight That Drives Action

The system begins with clear insight into students' social-emotional strengths and needs.

### DESSA provides trusted data that helps schools:

- Screen students early with DESSA-Mini
- Measure key social-emotional competencies
- Monitor student progress throughout the year
- Identify students who may benefit from additional support

**This insight** establishes the foundation for aligned classroom instruction and targeted intervention.

## From Insight to Daily Practice

Move This World extends this system into everyday classroom routines.

Through short, video-based experiences, students practice the same competencies measured through DESSA, helping teachers translate assessment insight into consistent skill-building.

### Daily experiences help students:

- Practice emotional regulation
- Build self-awareness and resilience
- Strengthen relationships with peers and teachers
- Reinforce the competencies identified through DESSA data skill-building.

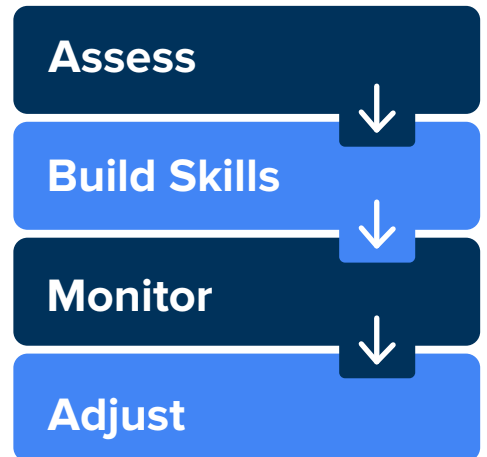

**The result:** skill development becomes a natural part of the school day, not just an occasional intervention.

## A Continuous Cycle of Support

Together, DESSA and Move This World create a continuous cycle that helps schools respond to student needs and refine support over time.

- Assess student strengths and needs with DESSA
- Reinforce targeted competencies through Move This World routines
- Monitor progress with ongoing DESSA data
- Adjust instruction or intervention as student needs evolve

This cycle connects insight, instruction, and measurement into one coordinated system.

## A Stronger MTSS Framework

Together, DESSA and Move This World support all tiers of student support within an MTSS framework.

**Tier 1** Daily classroom experiences that build foundational social-emotional skills.

**Tier 2** Targeted skill development for students who need additional reinforcement.

**Tier 3** Data-informed interventions guided by ongoing progress monitoring.

By aligning screening, instruction, and intervention, schools gain a coherent system for supporting student behavioral health across all tiers.
